

# Assignment 1

Course: KIT202 Secure Web Programming

Criteria	HD+	HD	DN	CR	PP	NN	NN-	Criterion Score
Overall Structure is clear and functions with the given specification are completed. (60%) ILO 1	60 points Have clearly identified the functional requirements of both the site operator and user and have fully met those requirements. All of the required functions are implemented to high (professional) standard.	54 points Have implemented a site that provides the functions that best support the users' needs using current best practice. All of the required functionalities are correctly implemented.	48 points Have implemented the majority of the requirements in a manner that makes the site functional and easily accessible.	42 points Have fully implemented the basic functions required for the site to an acceptable level and / or not all functions are implemented or operated correctly.	36 points Have identified and attempted to provide only the basic functional requirements, and/or not all functions are implemented or operate correctly.	30 points Have not included enough requirements to meet the basic functional requirements and /or the majority of the functions are not implemented or operate correctly.	24 points Little work completed for Assignment 1 and / or a site of an adequate professional standard.	/ 60
Design and implement a web site to meet the specification. Right tools used for Appearance. (20%) ILO 2	20 points Have completed all the requirements to a high level, with a consistent, professional look and feel throughout. In addition to useful and meaningful comments in the code, human readable comments included for better maintainability.	17.8 points Have designed and completed all the requirements to a high standard. Have provided logical and meaningful implemented with minimal mistakes and minimal incorrect spelling/typing errors. Useful and meaningful comments included for all key aspects all the code.	15.8 points Have a site that has a consistent tone and style with each section divided logically and meaningfully. Useful and meaningful comments included for the majority of the key aspects of the code.	13.8 points Have divided the content of each section in a logical and meaningful way. Some useful and meaningful comments included in the code.	11.8 points Have divided the content of main sections in a logical and meaningful way some meaningful comments included in the code.	9.8 points Some attempt to apply design principles evident, but not to the required standard and / or not consistently applied with no clear separation of design and content. A few meaningful comments included in the code.	0 points Required design principles not adhered to and / major requirements not implemented of working correctly. No or meaningless comments included in the code.	/ 20

Criteria	HD+	HD	DN	CR	PP	NN	NN-	Criterion Score
Database Design in ER Diagram. (20%) ILO 3	20 points Have considered all the necessary data and it can be stored in successfully. Fully ready to convert it to SQL statements.	17.8 points	15.8 points Have considered most of possible situations. A little adjustment could be possible.	13.8 points	11.8 points Have fundamental tables are considered. Major adjustment may be recommended.	9.8 points	0 points	/ 20
